

## **THE PROGRAM: BUSINESS/EDUCATION PARTNERS**

**Most employers work with students, already. The system presented here allows you to customize your level of participation in advance with pre-determined activities and a pre-determined number of placements.**

**Research says that employers are finding a lack of preparation and work-based knowledge in potential employees today.**

**We know that business is committed to quality education and training in a work-based environment. With this database, you determine educational and skill requirements, appropriate age, and other decorum.**

**This county-wide database can streamline School-to-Work activities for you and provides a way for your business to be involved and give back to the community.**

**In simple terms your business participates according to its own level of interest, ability, size, and time constraints. Limiting excessive contacts becomes an important advantage, too.**

**An interview process, screening of each participant, and student interest in a particular Career Pathway prior to arriving on the job-site assures a positive experience.**

**This process will create a WIN-WIN situation for both the employer and the student involved in the program.**
