

# **Summer Teacher Internship Program**

**Description: The School-to-Work grant through the Workforce Development Council is a partnership between Yakima Valley school districts which provides an opportunity for TWO teachers per district to participate in a Summer Internship Program.**

**Teachers will visit a variety of businesses in the Yakima Valley over a six-week period. During the internship, teachers will assess and document skills required for jobs at local businesses. Upon completing the internship, teachers will work cooperatively with Yakima County Development Association and Perry Technical institute to design and implement basic skills and career orientation curriculum/lessons as well as a skills certificate which responds to local employer needs.**
